#### MBT series displays and controls - individual solutions for the most demanding requirements

#### MCD 2000" communication desk

Display and PC control unit with comfortable guided function and extensive databases for professional use.

#### "Classic" and "Competence" Multi-analogue displays

Clear display of measured values on pointer instruments that are easy to read. The (2-way) "Classic display" and the (4-way) "Competence display" with VARIODATA digital displays can also be equipped to display additional measured values such as axle load, brake pressure, deceleration, braking force and pedal force, as well as to include user guidance.

- Lockable drawer for keyboard and PC mouse
- 2 Integrated switch cabinet for tester control
- **3** Option: Side shelf for additional equipment
- Digital/optical differential display
- **5** VARIODATA extension module 1 4
- **6** Option: Ticker text

### MBT SERIES ROLLER BRAKE TESTERS

#### the right tester for all requirements

#### MBT 3000 SERIES

Thanks to an authorized traversable axle load of 8 t, the MBT 3000 series roller brake testers are especially suitable for testing light trucks, vans and motorized caravans. The compact design of the roller set ensures easy installation with no need for extensive preparations or an installation pit. The display design can be either analog or a digital version with a PC. Even the basic version provides the ability to expand to a complete test lane with shock absorber tester and side slip tester.

#### **MBT 4000 SERIES**

MBT 4000 series testers stand out thanks to their high flexibility in terms of potential applications. The roller set dimensions offer the best testing capabilities for standard cars and trucks. The separated roller set design is particularly suitable for assembly using an installation pit. The display design can be either analog or a digital version with a PC and can be extended to include a test lane.

#### **MBT 5000 SERIES**

Testers for "mobile roadside inspection" in particular have been developed in the MBT 5000 series. The low minimum height means that these testers are mobile and flexible, and can be used without installation pit preparations. The display design can be either analog or a digital version with a PC.

#### **MBT 6000 SERIES**

Appropriate test equipment is required for testing the brakes of vehicles with large wheel dimensions and variable track widths. The MBT 6000 testers have been specially developed to meet these requirements and are characterized by their unique dimensions. They can be used for agricultural vehicles or special vehicles of any kind. MBT 6000 series testers offer (almost) limitless options. The display design can be either analog or a digital version with a PC.

#### **MBT 7000 SERIES**

Recommended by vehicle manufacturers and used by international testing organizations in continuous operation. MBT 7000 series testers are the world's most commonly used brake testers and are used for truck diagnostics in particular. The optimized roller set dimensions make these benches versatile for both truck and car testing. These test benches can be upgraded with many accessories and offer a wide range of diagnostics options, even when vehicle throughput is high. The display design can be either analog or a digital version with a PC and can be extended to include a test lane.

#### **MBT 3000 SERIES**

Thanks to an authorized traversable axle load of 8 t, the MBT 3000 series roller brake testers are especially suitable for testing light trucks, vans and motorized caravans. The compact design of the roller sets ensures easy installation with no need for extensive preparations or an installation pit. The display design can be either analog or a digital version with a PC. Even the basic version provides the ability to expand to a complete test lane with shock absorber tester and side slip tester.

Example illustration: MBT 3200 LON

#### **Description**

- · Automatic start-up monitoring
- Delayed automatic switch-on after entering the tester
- Automatic cutoff at selected slip with pointer stop and automatic restart
- · Automatic switch-off after exiting the tester
- · Single wheel switchover
- · Electronic DMS measuring system
- Self-supporting, enclosed roller set
- · Welded roller surface (plastic coated on request)
- · Star-delta switching
- · Lockable main switch
- TUV approved
- · Corrosion protection: Powder coating

#### With 3200 LON and 3200 with optional 4WD regulation set:

Multi-analogue display with two analog index clocks (diameter 2 x 350 mm) and integrated switching and electrical cabinet. Display option for brake tester, side slip tester and shock absorber tester.

Differential (LED bar) display for assessing braking force imbalance, shock absorber imbalance and side slip deviation.

#### With 3250 EUROSYSTEM and 3250 with optional 4WD regulation set:

Communication desk or switch cabinet for tester control, lockable drawer for keyboard and computer mouse, storage compartment for writing accessories, etc. The monitor support is set up pursuant to the VESA standard. Measured value, differential display and graphics on a PC monitor (optional).

Multi-analogue display Clear display on pointer instruments that are easy to read.

#### **MBT 4000 SERIES**

MBT 4000 series testers stand out thanks to their high flexibility in terms of potential applications. The roller set dimensions offer the best testing capabilities for standard cars and trucks. The separated roller set design is particularly suitable for assembly using an installation pit. The display design can be either analog or a digital version with a PC and can be extended to include a test lane.

Example illustration: MBT 4200 LON W CLASSIC

#### **Description**

- · Automatic start-up monitoring
- · Delayed automatic switch-on after entering the tester
- Automatic cutoff at selected slip with pointer stop and automatic restart
- · Automatic switch-off after exiting the tester
- · Single wheel switchover
- · Electronic DMS measuring system
- Self-supporting split roller set
- · Rear roller banked by 40 mm
- Welded roller surface (plastic coated on request)
- · Star-delta switching
- · Splash-proof motors
- TUV approved
- · Lockable main switch
- · RS 232 interface connector
- · Corrosion protection: Powder coating

#### With 4200 LON and 4200 with optional 4WD regulation set:

Multi-analogue display analog display with two (CLASSIC) or four (4WD, COMPETENCE) index clocks. (Diameter 2 or 4 x 350 mm) and integrated switching and electrical cabinet.

Display option for brake tester, side slip tester and shock absorber tester. (3-digit) differential display for assessing braking force imbalance, shock absorber imbalance and side slip deviation.

#### With 4250 LON and 4250 with optional 4WD regulation set:

Communication desk or switch cabinet for tester control, lockable drawer for keyboard and computer mouse, storage compartment for writing accessories, etc. The monitor support is set up pursuant to the VESA standard. Measured value, differential display and graphics on a PC monitor (optional).

#### Multi-analogue display

Clear presentation on clearly readable dial instruments, combined with VAR-IODATA digital displays and (moving text) user interface.

#### **MBT 6000 SERIES**

Appropriate test equipment is required for testing the brakes of vehicles with large wheel dimensions and variable track widths. The MBT 6000 testers have been specially developed to meet these requirements and are characterized by their unique dimensions. They can be used for agricultural vehicles or special vehicles of any kind. MBT 6000 series testers offer (almost) limitless options. The display design can be either analog or a digital version with a PC.

Example illustration: MBT 6000 series

#### **Description**

- · Automatic start-up monitoring
- Delayed automatic switch-on after entering the tester
- Automatic cutoff at selected slip with pointer stop and automatic restart
- · Automatic switch-off after exiting the tester
- · Single wheel switchover
- · Electronic DMS measuring system
- DC brake (electric drive-off aid)
- · Self-supporting split roller set
- · Rear roller banked by 50 mm
- · Welded roller surface (plastic coated on request)
- · Star-delta switching
- · Splash-proof motors
- TUV approved
- · Lockable main switch
- · RS 232 interface connector
- · Corrosion protection: Powder coating

#### With 6200 LON version:

Multi-analogue display with two analog index clocks (diameter 2 x 350 mm) and integrated switching and electrical cabinet. Display option for brake tester, side slip tester and shock absorber tester. (3-digit) differential display for assessing braking force imbalance, shock absorber imbalance and side slip deviation.

#### With 6250 EUROSYSTEM version:

Communication desk or switch cabinet for tester control, lockable drawer for keyboard and computer mouse, storage compartment for writing accessories, etc. The monitor support is set up pursuant to the VESA standard. Measured value, differential display and graphics on a PC monitor (optional).

Multi-analogue display

Clear presentation on clearly readable dial instruments, combined with VAR-IODATA digital displays and (moving text) user interface.

#### MCD 2000 communication desk

 Display and PC control unit with comfortable guided function and extensive databases for professional use.

The adapted design ensures that 
wheel diameters of up to 2.2 m can be tested easily.

Flexible use

Installation can be either on the ground or in an existing foundation.

\* Option

#### **MBT 7000 SERIES**

Recommended by vehicle manufacturers and used by international testing organizations in continuous operation. MBT 7000 series testers are the world's most commonly used brake testers and are used for truck diagnostics in particular. The optimized roller set dimensions make these benches versatile for both truck and car testing. These test benches can be upgraded with many accessories and offer a wide range of diagnostics options, even when vehicle throughput is high. The display design can be either analog or a digital version with a PC and can be extended to include a test lane.

Example illustration: MBT 7250 EUROSYSTEM

#### **Description**

- · Automatic start-up monitoring
- Delayed automatic switch-on after entering the tester
- Automatic cutoff at selected slip with pointer stop and automatic restart
- Automatic switch-off after exiting the tester
- · Single wheel switchover
- · Electronic DMS measuring system
- Self-supporting split roller set
- · Rear roller banked by 50 mm
- Welded roller surface (plastic coated on request)
- · Star-delta switching
- · Splash-proof motors
- TUV approved
- · Lockable main switch
- · RS 232 interface connector
- · Corrosion protection: Powder coating

#### With 7200 LON version:

Multi-analogue display analog display with two (CLASSIC) or four (4WD, COMPETENCE) index clocks. (Diameter 2 or 4 x 350 mm) and integrated switching and electrical cabinet. Display option for brake tester, side slip tester and shock absorber tester. (3-digit) differential display for assessing braking force imbalance, shock absorber imbalance and side slip deviation.

#### With 7250 and 7250 with optional 4WD regulation set:

Communication desk or switch cabinet for tester control, lockable drawer for keyboard and computer mouse, storage compartment for writing accessories, etc. The monitor support is set up pursuant to the VESA standard. Measured value, differential display and graphics on a PC monitor (optional).

O Optionally available

- Not available

The input screen for vehicle and owner data can directly access the SQL database.

During the braking test, all relevant data is displayed clearly.

Clear presentation of brake values with graphical and digital analysis.

Predefined test sequences reduce the effort required to operate the equipment to a minimum.

### **ACCESSORIES**

(excerpt)

### PLANNING EXAMPLES FOR THE WORKSHOP

#### **Solutions for load simulation**

**MLS 2100/2200 load simulator** 2-way HD cylinder for fixed or moving (on rails) floor mounting.

Roller set lifting
Hydraulic roller set lifting for axle load displacement on the axle being tested.

**Fastening clips**For fastening the belt to the vehicle frame.

**Ground anchor**For holding the vehicle frame or the axle during lifting.
